WORK EXPERIENCE

Deloitte

Forward Deployed Engineer - ZoraAI **January 2025 – Present**

- Led design of document parsing pipelines integrating **GenAI** and **OCR** providers (OpenAI GPT, Claude, Gemini) for PDF and image inputs, serving as the technical point of contact with AWS executives to drive evaluation of migrating from a hybrid architecture to **Amazon Bedrock**
- Led backend system design and development for an AI-driven Invoice Management platform, building serverless, event driven services with **AWS CDK**, **Lambda**, **DocumentDB**, and **GCP Document AI** to integrate with SAP and Oracle ERP systems at scale
- Implemented an **agentic** commission document extractor with **LangChain** and **LangGraph** for intelligent parsing and **LangFuse** for tracing and prompt versioning / improvement, extracting 99% accuracy on over 100 documents
- Architected and implemented a version controlled rule lifecycle system using **Python** and **FastAPI** for ZoraAI Rules Engine, supporting draft, review, audit, and publish workflows; improved maintainability of 100+ production rules and reduced turnaround time for complex logic updates
- Deployed and maintained production versions of LLM excel and PDF parsers on **SAP BTP Kyma** for a Fortune 100 client
- Refactored invoice parsing and validation logic to handle standard invoices and credit memos, designing it as a reusable, productized asset to support standardized **SAP** and **Oracle** posting workflows across Deloitte client engagements
- Improved backend reliability and release confidence by increasing automated test coverage from 2.8% to 80%+, implementing unit, integration, and contract tests using **PyTest**, and integrating tests into **CICD** pipelines
- Reduced AI tooling overhead across the engineering team by optimizing token consumption and request patterns in **GitHub Copilot** and **Claude Code**, lowering inference costs and improving developer throughput

Software Engineering Summer Scholar **June 2023 – August 2023**

- Leveraged Gen AI and prompt engineering to categorize 1000+ risks for a leading biotech client, cutting times by 50%+
- Designed 3 low-fidelity wireframes for a generative AI chatbot UI in **Figma** for a production-ready chatbot interface
- Developed an LLM (OpenAI) based Q&A chatbot with **Python Gradio**, which reduced document review times by 50%+
- Researched UI/UX design principles for Gen AI development, specifically for Figma design

Northrop Grumman

Technical Intern **June 2021 - June 2023**

- Implemented a procurement visibility dashboard with **Tableau** to aid with the organization of 1000+ purchase orders
- Created 10+ flow charts and diagrams in **Lucidchart** to outline process taken to organize financial data within the sector
- Redesigned an outdated **SharePoint** website used by 15+ program managers
- Automated **Excel** data handling (**VBA**, **Power Query**) to expedite over 1,000 entries, eliminating hours of manual processing

PROJECTS

AudioAura: Music Visualizer **January 2024 – May 2024**

- Music visualizer that displays a unique soundwave and colors based on songs pulled from the **Spotify API**, developed in **Python**, and hosted with **Flask** and **Firebase**
- Lead Front end design and development of dynamic visualizations that responded to music amplitude and frequency using **Figma**, **React**, **p5js**, and **Tailwind CSS**
- Integrated **Gemini API** to change the color scheme of the visualization based on a song's mood, tone, and energy

SKILLS

- **Certifications**: **AWS Cloud Practitioner**, Deloitte Frontend Development - Foundation, Deloitte Software Engineering Bootcamp
- **Technical Skills**: Python, JavaScript (Node.js, TypeScript), Java, C++, Haskell, SQL, SAP BTP, PostgreSQL, React, HTML, CSS, REST APIs, LangChain, GenAI (OpenAI GPT, Claude, Gemini), React, AWS (Lambda, CDK, S3, CloudWatch, Cognito, Secrets Manager, DocumentDB, API Gateway, Bedrock), Docker, Kubernetes, MongoDB, Git, CI/CD, SonarQube, GCP Agents, Claude Code, Github Copilot

EDUCATION

Texas A&M University, Honors Computer Science, Cum Laude **August 2020 – May 2024**

Universidad Carlos III de Madrid, Computer Science & Business **August 2023 – December 2023**
